

Contents

- 113** Buffer allocation method of serial production lines based on improved ant colony optimization algorithm

Zhou Binghai (周炳海), Yu Jiadi

- 120** Bionic jumping dynamics of the musculoskeletal leg mechanism for quadruped robots

Lei Jingtao(雷静桃), Wu Jiandong

- 128** Study on co-simulation model of forging manipulator based on virtual prototyping

Zhai Fugang (翟富刚), Zhu Hanyin, Wu Qilei,

Kong Xiangdong

- 135** Evaluation of cable tension sensors of FAST reflector from the perspective of EMI

Zhu Ming(朱明), Wang Qiming, Dennis Egan, Wu Mingchang,

Sun Xiao

- 142** Distributed cubature Kalman filter based on observation bootstrap sampling

Hu Zhentao (胡振涛), Hu Yumei, Zheng Shanshan, Li Xian,

Guo Zhen

- 148** Learning trendiness from twitter to web: a comparative analysis of microblog and web trending topics

Wang Dong (王栋), Xie Gaogang

- 160** Quotient space model based on algebraic structure

Chen Linshu (陈林书), Wang Jiayang, Li Li, Yang Zhenghua

- 170** An optimizing algorithm of static task scheduling problem based on hybrid genetic algorithm

Liu Yu (柳玉), Song Jian, Wen Jiayan

- 177** Removal of jamming using independent component analysis in non-cooperative passive detection system

Ying Tao (应涛), Huang Gaoming, Shan Hongchang,

Zuo Wei, Gao Jun

- 183** A cooperative user selection scheme based on energy efficiency and interference factor in cooperative communication systems

Li Meng (李萌), Sun Enchang, Yu Fei Richard,

Zhang Yanhua

- 192** Abnormal activity detection for surveillance video synopsis

Zhu Xiaobin (祝晓斌), Wang Qian, Li Haisheng, Guo Xiaoxia,

Xi Yan, Shen Yang

- 199** Identity-based proxy multi-signature applicable to secure E-transaction delegations

Liu Jianhua (刘建华), Wu Qianhong, Liu Jianwei, Shang Tao

- 207** Improved Roberts operator for detecting surface defects of heavy rails with superior precision and efficiency

Shi Tian (石甜), Kong Jianyi, Wang Xingdong, Liu Zhao,

Xiong Jianliang

- 215** Intelligent outdoor video advertisement recommendation system based on analysis of audiences' characteristics

Liu Peng (刘鹏), Li Songbin, Deng Haojiang, Wang Jinlin

- 224** SCMR:a semantic-based coherence micro-cluster recognition algorithm for hybrid web data stream

Wang Min(王珉), Wang Yongbin, Li Ying
